

  
 THE  
**ROYAL COLLECTION**

The Royal Co. Srl has implemented the processing management system to meet market demands and comply with the parameters set by the brand specifications, to increase the sustainability of industrial processes and products. The company bases its work on respect for environmental values which is demonstrated in the corporate culture and relations with partners in the production chain. In addition to adapting the mandatory regulations, the company also intends to meet the voluntary limits imposed by the major brands. Consequently, it has raised the awareness of all the partners in the production chain with the aim of promoting the development of a sustainable culture. We believe, in fact, that it is the company's responsibility to observe the effects of its activities on the environment and intervene by directing economic development towards more sustainable balances in order to comply with strict international standards and the expectations of all stakeholders.

All products adhere to a production process designed to comply with the parameters listed below in the PRSL. The table below is given by way of example only and is in no way binding for The Royal Co. Srl. Any requirements must be communicated when the order is submitted.
